

Energize your soil!

For higher yields
and greater results

THE COMPOST STORE offers you a direct source for high quality compost. Our compost is an environmentally friendly soil amendment made of yard trimmings and landscape materials. This compost is especially recommended for agricultural, landscape, and erosion control applications.

By applying compost from The Compost Store, you avoid wasting useful, natural resources and unnecessarily creating environmental problems, while simultaneously providing growers with a nutrient-rich soil amendment.

Farmers, landscapers, and vineyard managers who have used The Compost Store's products agree that our compost:

- Adds nutrients to soil and enhances beneficial organisms
- Improves soil tilth and structure
- Promotes strong root systems and builds disease resistance
- Elevates levels of organic matter in soil
